Since 1st January 2017, pesticide use in parks and other public areas is banned, except in emergency situations in order to control the invasion of harmful species. Pesticide use on railway lines, in airports and on roads are not covered by the ban. Moreover, two future laws will further ban pesticide:

- As of 1st January 2019, prohibition of the placing and the holding of plant protection products for non-professional use
- As of 1st September 2018, prohibition of the use neonicotinoids based-products

Moreover, Joël Labbé, Senator of Morbihan and Vice-President of the Commission of Economic Affairs in France, has launched an EU proposal for banning pesticides use outside agriculture.
